

# **Technical Specifications OPTOTRONIC® OT 50W 1250C Programmable LED Driver**

600 - 1250 mA (1mA step) (Default: 700 mA)

15-55 VDC

# OPTOTRONIC® OT50W/UNV/800C/2DIMLT2/P6

## **Electrical Specifications**

Input		
Input Voltage (VAC)	120V-277V (+/- 10%) 50 - 60 Hz (+/- 5%)	
Frequency Range (Hz)		
	120V	277V
Input Current (A)	0.5	0.22
THD @ Full load	<10%	<6%
Power Factor @ Full load	>0.99	>0.97
Efficiency @ Full load	≥85%	≥87%
Inrush Current (Apk)	29A@ 179µs	69A@ 191µs

General Information	
Item Number	*2743YN (79371)
Туре	Constant Current, Class 2
Output Power	50W (Max.)
Programming Tool	*274A17 (51645)
Software	Download
Programmable Features	Output Current Dimming Level LED thermal protection AstroDIM LedSet Gen2 Constant lumen output End-of-life indicator

Find (NAED) as cross refere	nce for new item	number i.e. *12345
-----------------------------	------------------	--------------------

<b>Environmental Speci</b>	fications	Dimming	
Find (NAED) as cross reference		Over Temperature Protection	Yes, Foldback at 100°C, Auto Recovery
Output Power 50W (Max.)  Programming Tool *274A17 (51645)  Software Download  Programmable Features Output Current Dimming Level LED thermal protection AstroDIM LedSet Gen2 Constant lumen output End-of-life indicator  Find (NAED) as cross reference for new item number i.e. *12345  Environmental Specifications	Output Short-Circuit Protection	Yes, non-latching	
	LedSet Gen2	Over Load Protection	Yes, current fold back @ 54W, non - latching
	LED thermal protection	Over Voltage Protection	Yes, non-latching
r rogrammable r catales	1	Line Regulation	< 5%
		Load Regulation	< 5%
		LED Power-Up Time	< 1sec
		Max. Output Power (W)	50W
	50W (Max )	Output Ripple Current	< 25% @ 1250mA
Type	Constant Current, Class 2		

Output

Output Current (mA)

Output Voltage (VDC)

Environmental Specifications		
Ambient Operating Temperature	-40°C to 55°C	
Max. Case Temperature (Tc)	88°C* 90°C (max)	
Max. Storage Temp.	70°C	
Max. Relative Humidity (%)	95% non-condensing	
Transient Protection	ANSI C62.41 Cat.B 6.0kV	
IP Rating	IP66	
UL Rating	Dry & Damp, Type HL	
UL File number	E320395	
EMI Compliance	FCC Part 15 Class A	
Sound Rating	Class A	
+ 5	26	

<sup>\* - 5</sup> year warranty applicable at 85°C

Dimming	
Dimming Control	0 - 10V (Isolated)**
	AstroDIM
Dimming Range	10-100%
Dimming Type	Analog
Source/Sink Current	0.9 mA
	D 16 D 1 D 1 D 1 D 1 D 1 D 1

**CAUTION:** Two power supplies if dimming is connected to non-class 2 circuits.

<sup>\*\* -</sup> Class 2 or non-class 2 wiring allowed

LED thermal protection (NTC)		(NTC)
ľ	NTC Value Active Range	≤25kΩ
ĺ	Temperature Derating Start	User defined

External NTC cannot leave the fixture.

The PRG/ NTC control circuit terminals or lead wires are not isolated.

The external NTC needs to be isolated or separated by live parts.

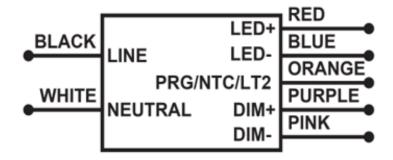

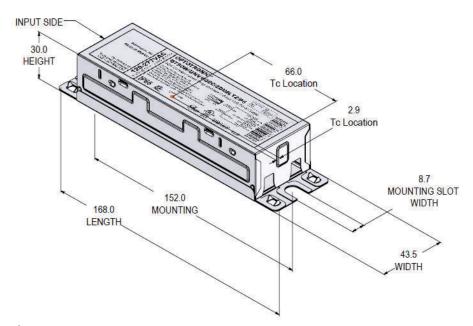

## **Wiring Diagram**

**<u>Note:</u>** - Maximum suggested remote mounting distance is 32 feet.

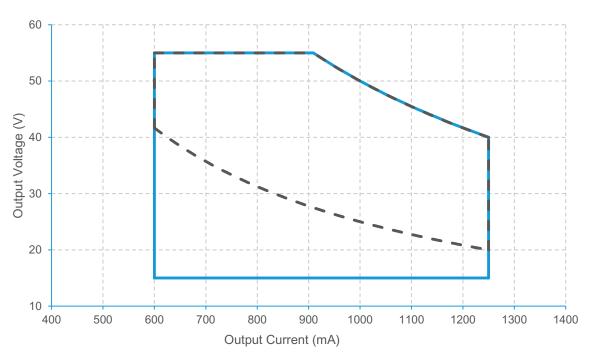

## **Mechanical Diagram**

## **Mechanical Specifications**

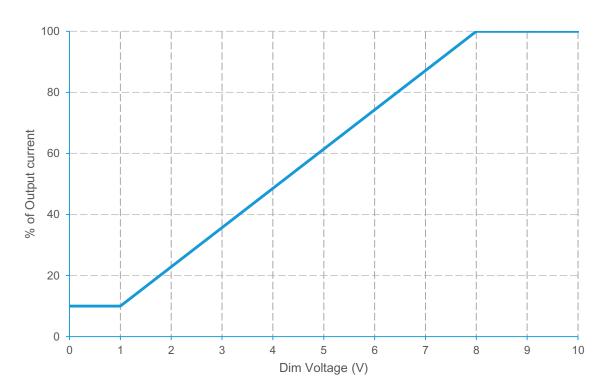

Length	6.61" (168mm)
Width	1.71" (43.5mm)
Height	1.18" (30.0mm)
Mounting Length	5.98" (152mm)
Mounting Slot Width	0.34" (8.7mm)

# **Operating Curve**

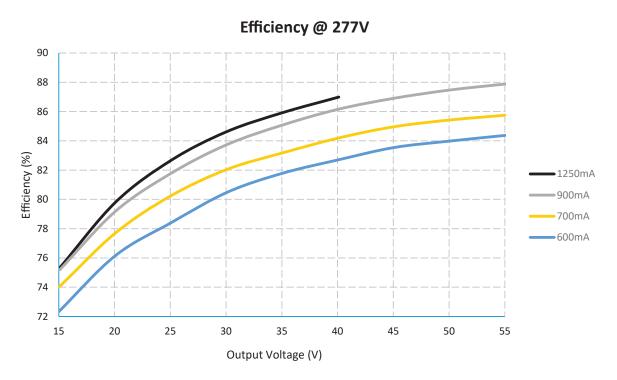

**Note:** Power factor >0.9 and THD <20% at 120V and 277V.

#### **LED Thermal Protection (NTC) Characteristic**

The LED thermal protection feature of the OT50W helps reduce the temperature of the LED module by reducing the output current in case of abnormal temperature conditions. To use this feature a third party NTC thermistor should be connected to the LED power supply as shown in the wiring diagram below.

In the end application, care must be taken to place the NTC thermistor close to the hottest spot on the LED module. If LED thermal protection is not required the NTC port on the LED power supply connector can be left open. Vishay, EPCOS, Murata, Panasonic are some of the manufacturers of NTC thermistor. EPCOS part number for reference only **B57164K153J (15k\Omega @ 25°C).** Murata part number for reference only - **NCP03XH223J05RL (22k\Omega @ 25°C).** For detailed information on LED Thermal Protection, please refer to the <u>Technical Application Guide</u>.

**Note:** Graphs for reference. The derating limits can be programmed using the OT Programmer.

Derating start =  $6.3k\Omega$ ; Derating end =  $4.3k\Omega$ ; Min output level = 10%

#### **End-of-Life Indicator**

The End-of-Life indicator feature helps the end user to receive a signal from the fixture indicating that it has reached its programmed life-time. After the LED driver reaches the programmed life-time, whenever it is turned ON, it stays at DIM level (10%) for 10 minutes and reaches its appropriate level.

#### **AstroDIM**

AstroDIM is an autonomous five level (1 Power ON & 4 Dimming levels) dimming protocol. It provides multi-stage night-time power reduction based on an internal timer; there is no need for an external control infrastructure. The ECG is automatically aligned to the on and off times for the street lighting and provide a defined output for the particular period of time. Compared with conventional systems there are significant cost savings. AstroDIM is designed for dimming without any external control wiring. Therefore, AstroDIM helps to save energy, extend the life of the driver and the LED module and reduce light pollution, even if only a power line is available. In AstroDIM operation, the driver executes a preset dimming profile, which can be reconfigured via the OT Programming Tool. The autonomous dimming is regulated by an integrated timer (no real-time clock), which adjusts the dimming profile according to the previous night (operation from switch-on to switch-off).

#### LEDset 2

LEDset (Gen2) is an analog interface, allowing basic communication between a LED control gear and one or more LED modules. It allows setting the output current of the LED driver by providing a highly accurate voltage reference (Vset) to the driver. The interface supports the following functions:

- Output current setting of the constant current LED control gear to single LED modules as well as toseries/parallel connected LED modules.
- Best matching of LED control gear and modules working point.
- Self-configuration according to system structure, automatic tracking of technology development.
- Easy mode of operation.
- Additional monitoring & protection features (e.g. thermal protection of the LED modules).

Therefore, the typical applications of this interface are single or multiple LED module parallel connections, offering an increasing choice of modular capabilities and low cost thermal protections circuits.

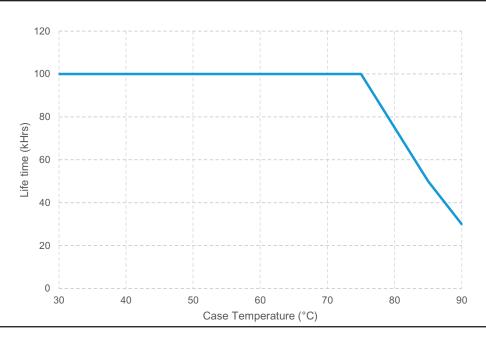

**Note:** When the LEDset feature is enabled, the LED Thermal protection (NTC) feature is disabled.

#### **Constant Lumen Maintenance**

The Constant Lumen Maintenance feature of the OT50W helps to maintain the required lumen output of the fixture at a constant level throughout its lifetime. In general LED's lumen output will depreciate over time and in order to maintain sufficient light level towards the end of lifetime, the LED's are driven at high current initially and will result in more energy consumption. The constant lumen maintenance will give the flexibility to drive the LEDs at optimal driving current throughout its lifetime. This helps in energy savings, constant light output and enhanced reliability of the system.

**Note:** Step-by-step instructions are outlined in the embedded OT Programmer User Manual with the software.

#### Lifetime vs TCase

## **Dimmer/Sensor Compatibility**

Manufacturer	Part Number	
Digital Lumens	EN-ILCM-1R10V-GB2-BK EN-ILCM-1R10V-GB2-BK/DR EN-ALC-1R10V-GB2-BK EN-ALC-1R10V-GB2-BK/DR	
Leviton	IP710-DLZ	
Lutron	DVTV-XX	
Wattstopper	ADF-120277	
Synergy Lighting Controls	ISD BC	

**Note:** The absence of a dimmer from this chart does not necessarily imply incompatibility. Please reference the dimmer manufacturer's instructions for installation.

### Warranty

OPTOTRONIC® by eldoLED Products are covered by a 5-year limited warranty. Complete warranty terms can be found at: <a href="https://www.eldoled.com/legal/terms-and-conditions">www.eldoled.com/legal/terms-and-conditions</a>
