

### 50W 0-10V 'Dim to Dark' LED Driver

#### SOLOdrive

LED dimming made beautiful - SOLOdrive offers industry-best Natural Dimming to dark, with any dimmer, in any application. The SOLOdrive works seamlessly with LED modules, controls and intelligent luminaire elements.

#### Product offering

#### SOLOdrive 564/S

Part number (P/N)	SL0564S3
Product description	SOLOdrive, 50W, 0-10V, 1 control channel, constant current, 1x 55V output, side feed, square metal

#### Features & benefits

Natural dimming	Dim to dark, smooth brightness changes, excellent flicker performance, adaptable dimming curves, configurable minimum dimming level
LEDcode	Configurable design to work with most constant current LED modules and arrays, while providing a connection point to integrated peripheral controls
Programmable	Fine-tune your driver for any application
Performance	Universal input voltage range, low inrush current and total harmonic distortion (THD), high power factor and efficiency
Camera compatibility	Hybrid HydraDrive technology is proven to work in TV studios and security camera environments

### Programming tools

Programming interface	<a href="#">TOOLbox pro (TLU20504)</a>
Programming cable set	<a href="#">TOOLbox pro to LED driver, programming cable, 5pcs (TLC03051)</a>
Programming Hand-held, Touch-and-Go	<a href="#">PJ0035HH1</a>
Programming jig	<a href="#">PJ0500S1</a>
Programming software	<a href="#">FluxTool</a>

### Warranty

Warranty period	<a href="#">General Terms and Conditions</a>
-----------------	--

### Order number configurator

**SL0564S3**

Part Number

mA  
LED Output Current

Dimming Curve

.  min  
Minimum Dimming Level

Start Up Performance

LED output current	Enter value in 1mA increments, e.g. "811" for 811mA
Dimming curve	"LOG" for logarithmic (default) "LIN" for linear "SLN" for soft-linear "SQU" for square
Minimum dimming level	Leave blank for default minimum dimming level of 0.1%. Specify in 0.1% increments, e.g. "10.5" for 10.5%.
Start-up performance	Enter "CA24" for improved start-up performance to comply with ENERGY STAR Luminaires v2.0 and the latest CA Title 24 standard, effective January 2017.

---

**Input characteristics**

---

Nominal input voltage range	120 - 250 VAC (ENEC), 120 - 277 VAC (UL) 120 - 250 VDC
Absolute input voltage range	108 - 305 VAC
Input frequency range	50 - 60 Hz
Maximum input current	0.65A @ 120 VAC 0.36A @ 230 VAC 0.30A @ 277 VAC
Efficiency at full load	87.5%
Power factor at full load	> 0.95
THD at full load	< 15%
Maximum inrush current	< 100mA <sup>2</sup> s @ 120 VAC < 100mA <sup>2</sup> s @ 230 VAC < 100mA <sup>2</sup> s @ 277 VAC
Surge protection	2kV differential mode (DM) 2kV common mode (CM)
Maximum standby power	< 0.5W

---

### Output characteristics

Maximum LED output power	50W
Number of LED outputs	1
	(UL Class 2)
Programmable LED output current range	150 - 1400mA
LED output type	Programmable in 1mA increments within specified current range
LED output current tolerance	+/- 5% at programmed LED output current
LED output voltage range	2 - 55V

### Operating window

### Control characteristics

Control channels	1
Control protocol	0-10V
	LEDcode
Dimming range	100% - 0.1%
Dimming curve options	Logarithmic (default) Linear Soft-Linear Square
Dimming method	Hybrid HydraDrive
0-10V current draw	< 2mA
Time delay to standby	< 30s

### 0-10V dimming chart

### Dimming curves

### Performance

#### Typical efficiency vs load

Tested with a load of 16 LEDs in series, programmed for 1000mA and at 25 °C ambient temperature. The measurements below 50W were performed by dimming the light output.

#### Typical power factor vs load

Tested with a load of 16 LEDs in series, programmed for 1000mA and at 25 °C ambient temperature. The measurements below 50W were performed by dimming the light output.

#### Typical THD vs load

Tested with a load of 16 LEDs in series, programmed for 1000mA and at 25 °C ambient temperature. The measurements below 50W were performed by dimming the light output.

### Typical flicker performance

Typical flicker percent as a function of frequency, measured across the dimming range. The results are overlaid with the low-risk (yellow) and no observable effect (green) levels as defined in IEEE P1789.

### Environmental conditions

Operating ambient temperature (Ta) range -20 °C to +50 °C

Maximum operating case temperature (Tc max) 75 °C

Acoustic noise – steady state <24dBA (Class A)

Lifetime 50,000 hours at a maximum case temperature (Tc) of 75 °C

UL Type TL  
 Measured Tref: 63 °C  
 Maximum allowed Tref: 83 °C  
 Measured at 1400mA

### Tc point location

---

## LED driver protection

---

Thermal	The LED output current is automatically decreased whenever the internal driver temperature exceeds a factory preset temperature. The LED output current is increased once the internal driver temperature drops below the preset temperature threshold. If the internal driver temperature continues to increase, despite a decrease in output current, the LED driver will eventually shut down.
LED output short circuit	The LED output current is cut off whenever the LED driver detects a short-circuit. The LED driver will attempt a restart every 400ms after a short-circuit is detected.
LED output open circuit	The LED output is turned off whenever the LED driver detects an open circuit. The LED driver will attempt a restart every 400ms after an open circuit is detected.
LED output overload	The driver monitors the LED output load. Whenever the output load exceeds the maximum output power rating of the LED driver, the output current is sequentially scaled down until the cumulative load drops below the maximum output power rating of the LED driver.
Reverse polarity	The LED driver will not yield any current if the polarity of the load on the LED output is reversed. This situation will not damage the LED driver but may damage the LED load.

---

## LED protection

---

Thermal protection LED	An external NTC thermistor, which is placed on a PCB near the LEDs, can be connected to the driver via the LEDcode/NTC terminals. The output current to the LEDs is then decreased by 75% whenever the NTC exceeds a maximum allowable temperature, which is specified by the user in the FluxTool software. The default NTC temperature limit is set to 70 °C.
Thermistor value	47kΩ
Suitable thermistors	Leaded: Vishay, P/N 238164063473 Screw: Vishay, P/N NTCASCWE3473J

### LED driver mechanical details

Weight	285 g
Mounting torque	Not to exceed 0.5Nm

3D Mechanical files for this product are available on the eldoLED website.

### Packaging

Length x Width x Height	508 x 305 x 178 mm / 20 x 12 x 7 in
Weight (including products)	13.3 kg
Products per box	40 pcs

### Connector layout

### Input wiring specifications

Connector type	push-in terminals
Connector supplier and series	Wago 250 series
Wire type	solid or stranded copper
Wire core cross section	0.5 - 1.5mm <sup>2</sup> / AWG 20 – 16
Wire strip length	9.0mm (11/32in)

### Output wiring specifications

Connector type	push-in terminals
Connector supplier and series	Wago 250 series
Wire type	solid or stranded copper
Wire core cross section	0.5 - 1.5mm <sup>2</sup> / AWG 20 – 16
Wire strip length	9.0mm (11/32in)
Maximum remote mounting distance of LED load	AWG 20 (0.52 mm <sup>2</sup> ) - 14 m / 46 ft AWG 19 (0.65 mm <sup>2</sup> ) - 18 m / 59 ft AWG 18 (0.82 mm <sup>2</sup> ) - 22 m / 72 ft AWG 17 (1.04 mm <sup>2</sup> ) - 28 m / 92 ft AWG 16 (1.31 mm <sup>2</sup> ) - 36 m / 118 ft

### Automatic circuit breakers (MCB)

Maximum loading	MCB type	B10	B13	B16	C10	C13	C16
		Number of LED drivers	14	18	22	14	18

---

**Standards and compliance**

---

UL, recognized component	UL 1310 UL 8750 (Class 2 output). Type TL LED driver.
ENEC safety	EN 61347-1 EN 61347-2-13 (Emergency lighting)
ENEC performance	EN 62384
Conducted emissions	EN 55015  FCC title 47 CFR part 15 class B
Radiated emissions	EN 55015  FCC title 47 CFR part 15 class B
Radio disturbance characteristics	EN 55022
Harmonic current emissions	EN 61000-3-2
Electrostatic discharge	EN 61000-4-2
RFE field susceptibility	EN 61000-4-3
Electrical fast transient	EN 61000-4-4
Surge immunity	EN 61000-4-5
Conducted radio frequency	EN 61000-4-6
Voltage dips	EN 61000-4-11
Electromagnetic immunity	EN 61547
ECODesign 2019/2020: Controlgear + luminaire	Flicker for LED: Pst LM $\leq$ 1.0 at full-load Stroboscopic effect for LED: SVM $\leq$ 0.4 at full load
0-10V	IEC/EN 60929 annex E NOTE: From 0.6V to 10V eldoLED LED drivers comply with IEC/EN 60929 annex E. Below 0.6V eldoLED LED drivers comply with ABL 0-10V Design Spec v1.2 enabling standby mode. For detailed dimming characteristics see 0-10V response chart in Control Characteristics.
Surge protection	IEC 61000-4-5 level 3: 2kV DM, 2kV CM @ 2 Ohm
Surge protection	ANSI 62.41 1991 category B1: 2.5kV DM, 2.5kV CM @ 30 Ohm  0-10V input: 0.5 kV DM, 1 kV CM surge
RCM	AS/NZS 61347.1, AS/NZS 61347.2.13
Restriction of hazardous substances	RoHS3 (Directives 2011/65/EU-2015/863/EU)

---

SVHC-list substances

REACH Art.33

### Certifications

### Safety

	<p>FELV control terminals marked “Risk of electric shock” are not safe to touch. Dimming connected to FELV control terminal shall be insulated for Low Voltage supply of the control gear. Any terminals connected to the FELV circuit shall be protected against accidental contact.</p>
	<p>Risk of electrical shock. May result in serious injury or death. Disconnect power before servicing or installing.</p>
	<p>The LED driver may only be connected and installed by a qualified electrician. All applicable regulations, legislation, and building codes must be observed. Incorrect installation of the LED driver can cause irreparable damage to the LED driver and the connected LEDs.</p> <p>Pay attention when connecting the LEDs: polarity reversal results in no light output and often damages the LEDs.</p>
	<p>LED drivers are designed and intended to operate LED loads only. Powering non-LED loads may push the LED driver outside its specified design limits and is, therefore, not covered by any warranty.</p>
	<p>eldoLED products are designed to meet the performance specifications as outlined at certain operating conditions in the data sheet. It is the responsibility of the fixture manufacturer to test and validate the design and operation of the system under expected and potential use cases, including faults.</p>
	<p>Please observe voltage drop over long cable lengths. Longer cable lengths increase EMI susceptibility.</p>
	<p>Product renderings and dimensional drawings are generic for the housing type. Product label, connector type and quantity may vary.</p>
