• 8-Way RDM enabled DMX splitter

• DMX/RDM compatible

• RDM enabled - ANSI E1.20 compliant

• Extend both cable distance (up to 300m) and the number of devices (up to 32 devices per output, total 256 devices)

• Plug and play, 3/5-Pin XLR male DMX input, eight XLR female DMX outputs

• 8 outputs are full isolated from the input, the outputs are not isolated from each other

• Each output provides LED data indicators, providing full confirmation of proper operation

• Supports bi-directional communications for discovery, addressing and DMX control of RDM enabled devices

• A feed through XLR female connector is provided at the input, allowing this unit to be placed in the middle of an existing DMX chain

Safety & Warnings

• DO NOT install with power applied to device.

• DO NOT expose the device to moisture.
